SUMMARY

Senior Web and Mobile Developer with 5+ years of professional experience building full-stack applications with **Angular**, **Java Spring Boot**, **Node.js** and **Flutter** at ClearPeaks. Game Designer and Developer and Co-Founder of **Yuuko Games**, with 6+ years in **Unity** and **C#** and several shipped games on PC, Android and web. Experienced in leading long-term projects with large teams, Scrum, CI/CD and performance optimization.

SKILLS

Frontend: Angular (5+ years), TypeScript, JavaScript, HTML, CSS/SCSS
Mobile: Flutter, Dart, Riverpod, Android
Backend: Java Spring Boot, Node.js, REST APIs, PostgreSQL, Microsoft Graph API, MSAL
Game development: Unity (6+ years), C#, URP, ProBuilder, Photon PUN, Flame, Twine, Blender
DevOps & workflow: Docker, CI/CD, Git, Git Flow, Jira, Scrum
Leadership: Team coordination, long-term project management, task prioritization

EXPERIENCE

Senior Web & Mobile Developer · ClearPeaks

Barcelona, Spain · September 2023 – Present

- Develop and maintain backend services with Java Spring Boot and Node.js.
- Coordinate and develop, with a team of 5, the administration panel and Flutter mobile app for Observation Deck, ClearPeaks' product for viewing and managing real-time data from multiple sources, such as Power BI and Oracle, in one place.
- Cut image load time in the Observation Deck app from 5–10 seconds to about 0.1 seconds through an image migration, and made API responses about 20% faster (article).
- Set up Docker containers and continuous deployment, shortening release cycles.
- Lead long-term projects with large developer teams using Scrum and Git Flow.

Junior Web Developer · ClearPeaks

Reus, Spain · February 2021 – September 2023

- Built backend services with Java Spring Boot and multiple Node.js services.
- Developed and maintained three Angular frontends.
- Integrated Microsoft Graph API and MSAL so users could share dashboards through Microsoft Teams and email (article).
- Built an employee scheduling app with Google OR-Tools (CP-SAT), Angular and PostgreSQL (article).

Co-Founder, Game Designer & Developer · Yuuko Games

Girona, Spain · April 2023 – Present

- Co-founded an independent game studio and shipped three games on PC, Mac, Android and web.
- Led a two-year project to deliver The Forbidden Door, a Unity horror puzzle game, and supported it with post-launch updates.
- Designed and built Threefold, a Flutter and Flame match-3 game with 5,000 procedurally generated levels.
- Published USignals, an open-source reactive signals package for Unity.

SELECTED PROJECTS

Threefold · 2026 · Flutter, Flame, Dart
Offline match-3 game for Android, Windows and web. 5,000 deterministic levels, each validated by simulation. English, Spanish and Catalan.

El tren de la vida · 2025 · Unity, Blender, Affinity Designer, FL Studio
Narrative puzzle game made in 48 hours at Game Jam El Modern Girona, with an original soundtrack I composed.

24h Antes del Apocalipsis · 2025 · Twine, HTML
Browser visual novel with branching choices and four endings.

The Forbidden Door · 2025 · Unity, C#
First-person psychological horror puzzle game for Windows and Mac, in three languages.

USignals · 2025 · Unity, C#
Open-source reactive signals package for Unity.

Masters Arena · 2021 · Unity, C#, Photon PUN
Real-time multiplayer MOBA. University final project, graded 10/10. Read the project report.

CataBot · 2020–2022 · JavaScript, Discord.js, Node.js, Heroku
Discord bot with music, games and an economy system. Most-used Catalan Discord bot in 2021, with 100k+ users.

More game jam and university projects: Endless Dungeon, Drag Them Out Into Space, SmokeFighter, ASCII Shader, The Angry Stewardess, PRAELIA, AIM Demo.

EDUCATION

Bachelor's Degree in Game Design and Development · University of Girona
2017 – 2021 · Final project: Masters Arena, real-time multiplayer game in Unity (grade 10/10) · Project report

LANGUAGES

English (full professional) · Spanish (native) · Catalan (native)

INTERESTS

Game jams, shaders and tooling for games, cycling, hiking and the gym.
